Date March 14, 2023

Overview

This bill authorizes street impact fees in municipal subdivisions and developments, and governs the imposition of, and disputes over, fees.

Summary

Section	Description
---------	-------------

- | | |
|---|--|
| 1 | <p>Street impact fee.</p> <p>Permits a municipality (city or town) by ordinance to impose a fee on a subdivision development to pay for acquisition, construction, maintenance, or improvement of streets, roads, intersections, and related transportation infrastructure, based on the municipality's approved transportation plan. Permits a municipality to deny a subdivision application based on an inadequate transportation system within the municipality. Previously subdivided property is exempt from the impact fee requirements unless the number of lots is increased, in which case the impact fee is limited to the net increase of lots.</p> |
| 2 | <p>Street impact fee nexus.</p> <p>Requires an essential nexus and rough proportionality between the fees charged and the purpose for the fees.</p> <p>Prohibits conditioning approval of a subdivision or development on an agreement to waive the right to challenge a fee if the municipality gets written notice of a dispute before the municipality's final decision on an application. Establishes procedures for proceeding with an application when there is a challenge to a fee.</p> |
